Faculty of Information and Communication Technology

ITCS212 Web Programming

JavaScript: Lab-L04 -1

Basic Calculator

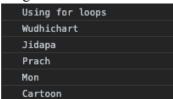

1. Create a program to calculate the results from 2 given numbers using 4 operations as shown in the below image

2. Save the file with the name "BasicCalculator.html"

Basic Loop

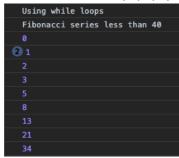

1. Create a program that can print your friends from an array using for loop as shown in the below image

2. Save the file with the name "BasicLoop.html"

Fibonacci

1. Create a program to print Fibonacci sequence to a given number. The Fibonacci Sequence is the series of numbers: 0, 1, 1, 2, 3, 5, 8, 13, 21, 34, ...

2. Save the file with the name "Fibonacci.html"

Array Methods

- 1. Create a program to use the array methods as follows: sort, reverse, pop, push
- 2. Use the following code as a starting point

3. The output will be as the below image. Note that the name list will be your friends' name.

4. Save the file with the name "Arrays.html"

Submission

Submission: Please zip all your works into one zip file namely "Lab-L04-1-[Section]-[StudentID].zip" and submit to the activity submission on Mycourses. For example, if your id is 6588999 and you are in the section 2, your file name will be Lab-L04-1-2-6588999.zip.

Note that if the file name in the incorrect format, your score will be deduced.
